development to the masses. What many avoid know is the fact that if you really want to improve your life, you really absolutely can do it by applying what he teaches. Exactly what still fewer know, however, is where HE learned what he teaches. Within fact, he is a much better marketer than the usual teacher (although I'm not banging his teaching skill) this is why you have heard of him but probably not observed of individuals like Milton Erickson, Richard Bandler, John Grinder, Bit James or other giant academics who discovered a big part of what became Tony's original publications (like this one). Read this book, but if you look at it being an introduction to the amazing concepts of mind power and then go to the sources (like those authors mentioned above) you will begin to access a part of the mind few people know exist- and that fewer have the curiosity and the courage to touch its power.
